## Abstract

This is a BibLaTeX style that implements the bibliography style of the Council of Science Editors (CSE) for BibLaTeX.

## 1 How to use the **biblatex-cse** style

1. Download the `biblatex-cse.bbx` and `biblatex-cse.cbx` files and put them in your document's main directory/folder.
2. Load `biblatex` with the option `style=biblatex-cse`, i.e.,

```
\usepackage[style=biblatex-cse]{biblatex}
```

## 2 How to contribute

I did this style file by request of a user of my [LaTeX template novathesis](#). He was quite thorough, double and triple checking that the output was conforming to the requirements of his University (Faculty of Veterinary from the University of Lisbon). Although this `biblatex-cse` style served the requirements from his University, there may still be some unconformities to the CSE style. If you find any, please open an issue in the [project's page on GitHub](#) or, even better, **submit a pull request**.
